

ADVANCED MES SYSTEM FOR PRODUCTION DIGITIZATION

LSCPRO MES

LSCPRO **MES** connects people, machines, and processes into a unified digital system. Monitor production in real time, manage work orders digitally, and gain a complete overview of production efficiency, quality, and traceability.

- » **THE RIGHT DATA.**
- » **THE RIGHT PROCESS.**
- » **THE RIGHT DECISION.**

KEY FEATURES

- Real-time production monitoring
- Digital work order management
- Production efficiency monitoring
- Traceability of materials and production operations
- Automatic data collection from machines
- Integration of the ERP system with production
- Overview of downtime and deviations

WHY LSCPRO MES?

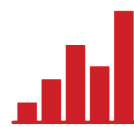

- Complete overview of production
- Real-time data for faster decision-making
- Less manual data entry
- Faster detection of downtime
- Improved traceability of production processes
- More efficient utilization of production capacity

PLAN.

DO.

MEASURE.

OPTIMIZE.

- » **REAL-TIME PRODUCTION**
- » **DIGITAL WORK ORDERS**
- » **EFFICIENCY AND ANALYTICS**
- » **PROCESS TRACEABILITY**
- » **INTEGRATION WITH MACHINES AND ERP**

Real-time production data. **LSCPRO MES** connects ERP systems, production machinery, and operators, enabling automatic collection and monitoring of production data. This gives you a clear overview of production status, work orders, downtime, and efficiency, allowing you to respond more quickly to deviations.
